D.K LIFT SERVICES

Premium Bespoke Platform Lifts

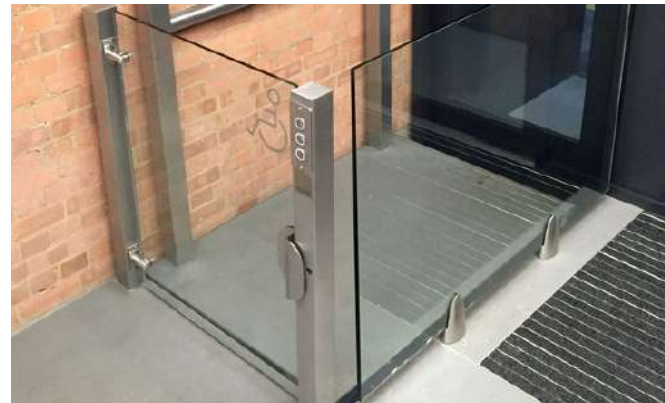

Our Premium Platform collection provides a range of platform lifts that can be adapted to suit a property style and architectural needs in both public and private buildings.

D.K Lift Services have partnered with UK manufacturing companies to provide design, manufacturing & installation on our premium collection range of elegantly bespoke and beautiful platform solutions.

In the UK, our collection stands out for something different, where year after year, new platform lifts and refreshed designs have been introduced, keeping pace with continually evolving architectural trends.

Providing a complete freedom of design choice of materials, finish and style, this is the premium service that will deliver the most bespoke platform lift that you can find in the UK.

Choose from 4 collections that suit every style and type of building and application.

WHY GO PREMIUM?

Our expertise in the design and manufacture of tailor-made platform lifts means we understand the importance of good design. As a result, each platform lift we hand-craft and install is of the highest quality, meeting the needs and demands of our customers.

Premium Open Aspect Platform Lifts

OVERVIEW

Each platform lift can be adapted to suit your property style and architectural needs perfectly. A stable and strong lifting mechanism provides up to a 2000Kg capacity, supporting special floor finishes and all barrier and balustrades types.

CONTEMPORARY DESIGNS

Create a stunning modern contemporary design, tailor made to meet your exact architectural and interior style requirements. Our platform lifts are available in a huge choice of beautifully crafted materials including timber, bronze, brass, cast replica materials, replica wrought iron, stone and steel finished in all RAL paint codes and metallic powder coats. Your own choice of platform finish can be laid in tray whether its, stone, slate, tiles or timber.

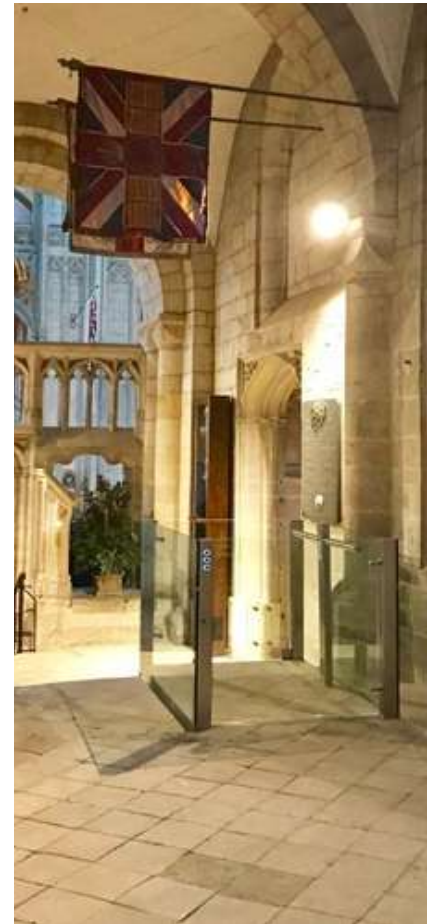

Premium Open Aspect Platform Lifts

HERITAGE DESIGNS

Our bespoke platform lifts can be dressed to compliment historic properties and projects in order to meet planning control and conservation needs. Our lifts have been installed in stately homes, grand residences, hotels, churches, cathedrals, castles, universities and theatres.

Connex Hidden Low Rise Platform Lifts

OVERVIEW

The Connex is your hidden solution for discreet access in prestige properties. Suitable for internal and external applications, these low visual impact lifts are perfect for most properties and complement all architectural styles beautifully. When not in use, the Connex is discreet and virtually invisible.

For public use, the Connex lift has been installed in retailers, hotels, restaurants, visitor centres, hospitality and prestige heritage sites such as cathedrals, churches and stately homes.

Connex Hidden Low Rise Platform Lifts

FEATURES

- Platform and side aprons can be finished with your choice of flooring – stone, tiles, timber and slate, etc.
- Bridges a few steps or the edge of a split level to a height of up to 500mm in commercial and public buildings and 600mm in private residential property
- Platform size and configuration can be specified by customer
- Suitable for disabled people and goods up to a capacity of 2000Kg
- Exceptionally stable platform that can be used as part of the regular floor
- Open sides can be fitted with automatically rising stops to prevent accidental roll-off
- Extra options include platform mounted controls and grab rails
- Complies with the Machinery Directive

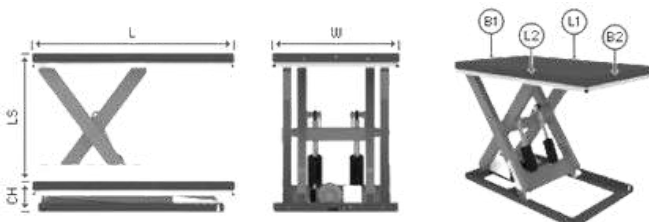

ICE Compact Low Rise Step Lifts

OVERVIEW

Our Independent Compact Elevator (ICE) is the first truly premium independent low rise step lift. Highly stylised, beautifully engineered, refined and exquisitely detailed, it offers a compact, contemporary solution for prestige properties. This product can suit any architectural or interior style - as discreet or bold as you desire. Each ICE is compact and very easy to install with minimal preparation required.

- Remote controlled LED guide lighting system for improved safety in low light conditions, dimmable and includes white and all primary colours for 'Party Mode'
- Remote power pack with emergency lowering
- Halo lit embossed controls
- Interlocked lower level gate
- Upper level gate, high side barriers and standing grab bar and controls are optional

Underground Bin Storage Lifts

OVERVIEW

Our innovative underground bin storage system brings many advantages of hiding unsightly yet necessary bins from view. Some less obvious but equally important benefits of underground bin storage are the measurable reduction in littering, vandalism and less foul odour due to cool year-round subterranean temperatures.

It can also be used to increase the amount of usable ground level space. For instance a car can be parked or a patio laid directly over the stored bin or bins.

Underground Bin Storage Lifts

FEATURES

- Bin store is push button operated and takes just a few seconds to raise and descend
- Allows easy access for rubbish disposal and bin collection
- Perforated sheet clad steel enclosures complete with safety edges to prevent trapping injuries and damage
- Roof of the bin enclosure is recessed and can be finished to match or complement the surrounding ground area with stone pavers, slate or artificial grass
- Various sizes of bin store are available
- Most popular size accommodates two or three residential wheelie bins
- Larger units are designed for apartment buildings and commercial use
- Requires a pit / tank connected to mains drainage, a sump pump or soak away
- Power pack can be located at ground level, in the house or garage or in its own underground compartment
- Crane equipped vehicle or gantry crane used to lift new bin store into position
