# CEILING LIFTER SOLUTIONS

D.K Lift Services work as a trade agent on behalf of Arjo, to supply, install and manage aftercare of the Maxi Sky 2 Track Ceiling Hoist. The Maxi Sky 2 delivers a complete and intuitive patient handling solution suitable for both long-term and acute care environments, assisting you in safeguarding the wellbeing of caregivers, patients and residents..

In today's busy care environments, ceiling lift solutions now set the benchmark for excellence in patient handling efficiency.

Studies show that just over 75% of caregivers prefer ceiling lifts over other solutions for patient transfers and handling. In some facilities, a significant 70% reduction of injury and compensation claims have been recorded following the introduction of a ceiling lift.

## TAKE YOUR PATIENT HANDLING CAPABILITIES TO A NEW LEVEL

- Promote a patient handling culture of best practice
- Save time in the transfer of dependent residents without compromising safety
- Support an efficient ceiling lift cleaning and disinfection process
- Modular components, means the system's installation procedure is fast and with minimal disruption to your environment, ensuring a proactive and efficient installation solution.
- Installation, commission and weight testing can take as little as 4 hours to complete.

# MAXI SKY® 2 SERIES

Infection control is crucial in all care settings. Safe patient handling equipment, which is often in frequent operation with a rotation of different patients, is no exception.

Helping you minimise the risks and associated burdens of cross infection in ceiling lift transfers, Maxi Sky 2 Infection Control enables you to take your patient handling capabilities to a new level.

## THE COMPLETE PATIENT HANDLING SYSTEM

### EASY CONNECTION, TURNING AND POSITIONING

Switch and secure spreader bars in just three simple steps using Quick Connect, the intuitive spreader bar attachment system. Once your patient is safely secured, the Dynamic Positioning System (DPS) or Powered DPS ensures the positioning and turning of your patient or resident can be effortless and precise.

# MAXI SKY® 2 SERIES

## A SAFE WORKING LOAD ACROSS PATIENT DEMOGRAPHICS

The SWL comes in a selection of: 272 kg (600 lbs), 200 kg (440 lbs) or 120 kg (265 lbs), delivering flexibility according to your need.

## INTUITIVE USABILITY FOR A SINGLE CAREGIVER

Featuring an easy-to-use handset control and colour display cassette showing essential data and battery life, Maxi Sky 2 is designed to optimise the working routine of a single caregiver.

## NEW INFECTION CONTROL UPGRADES

Boost the performance of your current Maxi Sky 2 and assist in minimising the risk of HAI with the new Infection Control upgrade including Infection Control lifting strap replacement, 100% silicon Infection Control emergency cord replacement, and 2-point spreader bar Infection Control Cover.

# MAXI SKY® 2 SERIES

## COMPREHENSIVE RANGE OF ACCESSORIES AND UPGRADES

To accommodate the unique and forever changing needs of individual patients and residents, we offer a comprehensive range of spreader bars and accessories, ensuring you are always able to tailor and optimise your transfer.

## SPREADER BAR OPTIONS

Infection Control Spreader bar

Medium 2-point

Small 2-point

Large 4-point

# MAXI SKY® 2 SERIES

## TAILORED COVERAGE FOR YOUR UNIQUE ENVIRONMENT

KWIKtrak delivers customised track solutions and room coverage for your Maxi Sky 2 series. This flexible system covers all layout requirements and solutions are available for a wide range of ceiling types.

KWIKtrak has been specifically designed with aesthetics in mind, providing a discrete solution that integrates seamlessly with your care environment. The flexible system helps you maximise the utilisation of your space without compromising the efficiency of your environment.

### Enhanced charging system (ECS)

Ensuring batteries are continuously charged, ECS makes sure your Maxi Sky 2 is always ready for use.

### Mobile options

KWIKtrak can also be assembled as a freestanding Semi-Permanent Rack, both as a single track or X-Y system for full room coverage.

### KWIKtrak curves

The KWIKtrak 90 mm track profile is available in 45° and 90° degrees – both compatible with ECS. Perfect profile symmetry means there are no curve-bending issues.

### Curtain pass through

Curtains can pass through a "gap" in the track, helping you provide privacy and maintain the dignity of your patient or resident if needed.
